UL-Gravity Door Coordinator

These reversible, automatic coordinating devices were designed for use on doors swinging in pairs with or without overlapping astragal, non-handed. Holds active door preventing it from closing before the inactive door. Helps protect the astragal. Gravity action arm adjustable on top.

- Specially designed for use on labeled fire doors in combination with Cal-Royal’s (AUTOFLM1 or AUTOFLW22) automatic (top) and self-latching (bottom) bolt combination
- Sex bolts required for door bracket for installations on wood covered composite 1-3/4” thick doors
- Unique design including a specially contoured cam with a guiding nylon roller that decreases friction thereby raising efficiency of the hardware system
- Conforms with ANSI/BHMA A156.3, Type 21
- Surface mounted
- Architectural finishes available
