1. Please follow the installation instruction on page 1 – 3. The shoe must be mounted at first stage.
2. Insert the bolt to the shoe from the rear, with the spring properly inserted to the bolt.
3. Align the shoe to the bracket with the correct position (left or right) corresponding to the door handing. Illustration shows left handing.
4. Tighten the screw using the supplied $\frac{5}{32}$" (4 mm) hexagonal wrench.

NOTE:
Spring Cush will slow the door down 5 degrees (5°) ahead from normal dead stop point. Despite installation of the Spring Cush, do not adjust BACKCHECK settings of door closer.
The hand must be correct before the bracket is mounted to the door stop (top jamb). Refer to page 1.

For Left Hand Doors
All brackets are shipped assembled for left hand door. Insert 5/16" (8mm) hex wrench into arm stop and turn anti-clockwise to seat as tightly as possible. Push filler plug in firmly.

For Right Hand Doors
Pull filler plug out of bracket. Using a 5/16" (8mm) hex wrench turn arm stop clockwise to remove from bracket insert in hole marked "R". Turn hex wrench clockwise to seat arm stop as tightly as possible. Push filler plug into other hole.

Installation Sequence
Left hand door shown – right hand door opposite

**CAUTION**
Improper installation or regulation may result in personal injury or property damage. Follow all instructions carefully.

**Installation Instructions**
1. Using template dimensions shown above, mark four (4) holes on door for door closer and three (3) holes on frame for parallel bracket.
2. Mount closer on door using screws provided. Speed adjusting valve must be positioned toward away from hinge edge.
3. Adjusting spring power to match door width or weight as indicated by power adjustment chart shown on page 1.
4. Mount closer on door to dimensions shown on page 1.

**Important Remarks**
Do not allow door to slam into frame.
A normal standard closing time from 90° open position is 5 to 7 seconds evenly divided between main closing (sweep) speed and latching speed. Adjust the closing speed first, then adjust the latching speed.
For slow closing speed of door turn speed adjusting valve of "C" (closing speed) clockwise and anti-clockwise for fast. Latching speed control of door is the same manner as closing speed adjustment.

**Adjustable Back Check Function**
This function is essential to the proper operation of the Super rigid parallel arm. Use just enough to prevent arm to striking stop with impact. See page 1.

**Attach Cover**
Install cover securely using screws provided.

**How to Hold-Open (90° Stop)**
A quarter turn on the hold-open control handle engages or disengages hold-open.
