INSTALLATION INSTRUCTIONS FOR ICGRB SERIES LOCKSETS

FOR USE ON DOORS 1-3/8" TO 2" (35mm ~ 51mm) THICK

TOOLS REQUIRED FOR NEW INSTALLATION
1 phillips head screwdriver
1 2-1/8" (54mm) hole saw
1 1" (25.4mm) drill bit
1 13/64" (5mm) drill bit
1 chisel

FOLLOW ALL STEPS FOR REMODELING OR NEW CONSTRUCTION.

FOLLOW STEPS 3C, 4C, 5, 6, 7, 8, 9 and 10 FOR DO-IT-YOURSELF REPLACEMENT, FOLLOWING REMOVAL OF EXISTING LOCK.

REPLACING EXISTING ENTRANCE LOCKS:
Before beginning, measure from center of lock to door edge in order to check length of backset on existing lock. The backset length of new lock is stated clearly on front of package. If backset size is the same, continue; otherwise, you'll have to replace lock with proper size backset.

Optional thrubolts are provided and recommended for use on high frequency doors. Warranty voided if optional thrubolt are not installed.

INSTALLATION INSTRUCTIONS

1. MARK DOOR

MARK ONE HOLE 2-1/8" (54mm) ON DOOR FACE. OPTIONAL: ALSO MARK TWO HOLES 13/64" (5mm), 5/16" (8mm) DEEP ON DOOR FACE.

MARK FOR 1" (25.4mm) HOLE IN DOOR EDGE.

NOTE: Backset on door face must be same as backset of lock.

2. DRILL HOLES

Start approximately 36° (914mm) from floor. Fold and apply template to edge of door and mark center of door edge as indicated on template. Mark center hole on door face through guide on template.

Drill 2-1/8" (54mm) hole through door face and two holes 13/64" (5mm), Drill 1" (25.4mm) hole in center of door edge for latch. OPTIONAL: 5/16" (8mm) deep as marked for lockset. It is recommended that holes be drilled on both sides to prevent splitting.

3. INSTALL LATCH

A Insert latch in hole keeping it parallel to face of door. Mark outline and remove latch. (NOTE: Latchbolt bevel must face to closing direction.)

B Chisel 5/32" (4mm) deep or until latch face is flush with door edge.

C Insert latch and tighten screws.

4. INSTALL STRIKE

A Close door until latchbolt touches jamb to locate strike in jamb and center line of strike. Open door and extend line from mark to door stop. Measure one half of door thickness from door stop and vertically mark drill point center for strike.

CAUTION: To ensure proper lockset function. Hole in jamb must be drilled a full 1/2" (12.7mm) deep.

B Drill 1" (25.4mm), hole 1/2" (12.7mm) deep in door jamb on drill point for strike.

Cut out jamb 9/64" (3.8mm) deep for strike. Tighten screws.

Guardbolt stops against strike, as illustrated, preventing forcing when door is closed. Adjustable tang on strike permits bending in or out to eliminate too loose fit between door and door stop.
# INSTALLATION INSTRUCTIONS FOR ICGRB SERIES LOCKSETS

## 5. REMOVE INSIDE KNOB

- Use nail and of wrench provided to depress inside knob catch in hole of inside sleeve collar and slide knob off spindle.

## 6. ADJUST OUTSIDE ROSE

- Adjust lock to fit door thickness by rotating outside rose. Lock will fit all doors 1-3/8" to 2" (35mm ~ 51mm) thick.

## 7. INSTALL LOCK

- Latch unit must be in place before installing lock. Be sure lock housing engages with latch prongs and retractor interlocks with 'atch tail.

## 8. INSTALL INSIDE ROSE

- Insert inside rose and reinforcing plate into hole, turn the reinforcing plate clockwise until the plate engaged with the hole, make sure the two rose grooves face to door hole, then use tool (either type of tool is attached) tighten inside rose securely.

## 9. REPLACE KNOB

- Align lug on knob with narrow slot on side of spindle and push knob all the way in until knob catch clicks into slot on knob. Otherwise knob will jam on shaft.

## 10. RIGHT KEY HOLE POSITION

- Upon installation of the lock, it may happen that key hole faces upward or downward as shown in the following drawing. It is advisable to correct all key hole to be facing downward.

## 11. IN ORDER TO ADJUST THE ABNORMAL STATE OF THE KEY HOLE FACING UPWARD, THE KNOB MUST BE PULLED OUT AND INSTALLED AGAIN. THE METHOD OF INSTALLATION IS DESCRIBED AS BELOW.

### a. First turn the knob clockwise until the knob catch appears in the small hole.

### b. With the other hand, turn the key counterclockwise within the limit of 30° ~ 90°

### c. Using a small nail to press the knob catch and pull the knob out.

### d. Install again according to the correct direction.

## TEMPLATE

- **Fit here on door edge**

- Template dimensions:
  - BACKSET 70mm (2-3/4")
  - BACKSET 60mm (2-3/8")
  - 51 45 40 35
  - 2" 1-3/4" 1-9/16" 1-3/8"
  - Mark 1" (25.4mm) hole at center of door edge.

- Optional Holes:
  - 5mm (13/64") x 2 hole
  - 2mm (5/16") deep

- For Thru Bolt Installation:
  - 64mm (2-3/4"")
  - 54mm (2-1/8"")
  - 62.7mm (2-15/32"")
**HOW TO CHANGE KEY HOLE POSITION**

1. Wrong key hole position.

2. Use control key to take out cylinder.

3. Turn the knob clockwise until the knob catch appears in the small slot. Use knob catch tool to depress the knob catch and pull the knob out.

4. Rotate knob to have figure eight hole in the upper area of knob. Align slot on side of knob with knob catch on spindle then push firmly in until knob catch clicks into slot on knob.

5. Put cylinder into the knob.

6. Right key hole position.
